### **Election/Restriction**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, 13 and 15, drawn to a therapeutic composition comprising a fusion polypeptide which binds CD38 and DNA, and a DNA sequence encoding a cytotoxic, and methods of using said composition, classified in classes 435, 530, and 514, subclasses 325 and 320.1, 350, and 2 and 44.
- II. Claims 12, 17, and 18, drawn to a polypeptide which binds CD38 and DNA, classified in class 530, subclass 350.
- III. Claims 14 and 16, drawn to a nucleic acid encoding a polypeptide, classified in class 536, subclass 23.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are distinct in that the compositions comprise elements which differ substantially one from the other in structural, physical, and biological properties. In particular, the composition of invention I include a DNA encoding a cytotoxic agent which is unrelated to the DNA encoding a fusion polypeptide which binds to CD38 and DNA of invention III or from the fusion polypeptide of invention II in physical and biological properties and functions. Further, DNA encoding a fusion polypeptide and the fusion polypeptide itself are also substantially different in structural, physical, and biological properties, are made using different reagents and

Art Unit: 1632

methods, and can be used for substantially different purposes. Note also that the polypeptide can be made synthetically without the use of the DNA, and that the DNA can be used for purposes other than making the protein, such as in in vitro hybridization assays.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, different classification, and different search requirements, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
